

## Policy:

### Industrial Safety and Hygiene & Environmental Protection

We are committed to law-abiding and the following:

- Educational Training: Make concentrated efforts to educate employees concerning environment , safety and hygiene notions. Establish a corporate culture of initiative and enthusiasm for each and every task.
- Advocating Communication: Enhance communication with employees and relevant interested parties , be a good neighbor to the community through environmental protection.
- Continuous Improvement: Strive to create a zero-accident work environment, save energy and reduce waste, strengthen our accident corrective and preventive capacity and then raise our overall environment , safety and hygiene performance.
- Health Concerns: Actively take part in safety care programs and health management activities in order to help prevent work-related injuries and promote the overall health of our employees.
- Risk Management: Strictly implement risk evaluation and environmental aspects, strengthen contractor's safety and hygiene management, risk control and pollution prevention measures in order to guard against potential injury or damage to employees or the environment.
